## ZENDAYA: PLASTIC SURGERY AT 25?

New photos of *Euphoria*'s Zendaya have sparked whispers the actress, 25, has gotten work done. "The most prominent change [in the two photos above] is Zendaya's nose," weighs in Chicago plastic surgeon Dr. Michael Horn (who has not treated Zendaya). "It does appear as if she has had a subtle rhinoplasty that does not make her look like a different person. The nose cartilage appears to have been trimmed, and the tip is more refined. Her nasal bridge and tip cartilage have been shaped smaller. The result is a natural but more defined nose with less width." Zendaya has neither confirmed nor denied she's gotten plastic surgery.
